Index

1 INTRODUCING THE CGIS SOFTWARE

CGIS Executive
- introduction 1-1
- online help 1-3

CGIS software
- warnings to workstation users 1-4

Conventions 1-3
Deleting windows 1-4
Organization 1-1
Resizing windows 1-5

2 USING THE CGIS EXECUTIVE

CGIS Executive
- branches of 2-2
- copy screen 2-10
- documentation 2-4
- e-mail 2-5
- entering 2-1
- exiting 2-11
- gopher 2-5
- help 2-7, 2-9
- moving within 2-8
- news 2-4
- other tools 2-3
- refresh screen 2-10
- report problems/comments 2-6
- selecting menu items 2-7
- shell to operating system 2-5
- to UIDL 2-3
- to UIMAGE 2-3

Remote site setup 2-1
Xhost 2-1

3 GETTING STARTED WITH THE CGIS SOFTWARE

CGIS Example
- using UIDL 3-15
- using UIMAGE 3-2

4 UIMAGE

3-D surface plot 4-51
Algebraic operations 4-72
Color
- ADJCT 4-41
- change color table 4-38
- change graph color 4-70
- change image colors 4-38
- conventional tables 4-38
- LOADCT 4-40
- XPALETTE 4-39

Colorbar 4-66
Contour maps 4-50
Cross sections 4-54
Data
- frequency table 4-19

Display/hide an object 4-36
Edge enhancement 4-63
Eplee
- conversion to MJy/sr 4-81, 4-84

Extract a face 4-36
Frequency slices 4-45
Frequency table 4-19, 4-20, 4-44
Graphs
- change axis ranges 4-68
- change axis titles 4-68
- change color 4-70
- overlay multiple 4-70
- pixel info from 4-59
- resize 4-69
- scaling 4-72

Grey scale 4-34
Hardcopies 4-31
Help 4-9
Histogram equalization 4-63
Histograms 4-58
IDL color tables 4-38
IDL save sets 4-22, 4-26
Integrate over frequencies 4-47
Journaling 4-4
Kernels 4-62
Labels 4-41
Mark positions 4-64
Modeling and fitting 4-77
    3 blackbody model 4-79
    background modeling 4-85
    Bose-Einstein 4-82
    polynomial fits to graphs 4-88
    subtract dipole + quadrupole 4-78
Overlays
    contour map 4-50
    coordinate grid 4-54
Pixel information
    from graphs 4-59
Projections 4-52
Refresh an image 4-37
Removing an object 4-35
Reporting problems/comments 4-7
Reprojections 4-52
Resize windows 4-44
Resolution
    array dimensions 4-22
    change array resolution 4-60
    definition 4-1
Save sets 4-22, 4-26
Scatter plot 4-59, 4-60
Single pixel
    spectrum of 4-46
Single pixels
    information 4-56

spectrum of 4-46
Sky cuts 4-54
Skycubes
face layout 4-1, 4-2
Smoothing 4-61
Spectrum
average of an area 4-47
of a single pixel 4-46
Statistics 4-58
Stretch contrast 4-37
Subtract a dipole 4-77
Terminology 4-11
Titles
graph axes 4-68
graph/object main 4-43
UGETDATA 4-27
UIMAGE
data I/O 4-11
data I/O - archives 4-16
data I/O - between UIMAGE and UIDL 4-24, 4-26
data I/O - FITS files 4-25, 4-28
data I/O - IDL savesets 4-22, 4-26
data I/O - initial products 4-12
display manipulations 4-35
exiting 4-8
hardcopies 4-31
help 4-9
journaling 4-4
modeling and fitting 4-77
moving within 4-2
reporting problems/comments 4-7
terminology 4-11
to UIDL 4-7
UPUTDATA 4-24
VT240 users 4-34
Weights
associate with an object 4-29
XPalette 4-39
Zooming 4-48
